Buy America Act
Napps NWC/NCC water cooled chillers

To Whom It May Concern:

The Buy America Act requires two things. First -- that the product be physically manufactured in the United States, and Second -- that the products cost content of materials be greater than 50% US materials.

This letter confirms that the Napps referenced water chiller meets the Buy America Act. The subject water cooled chiller units are manufactured and assembled at the Napps plant in Longview, TX. All major components are of US Manufacture, and 100% of all manufacturing labor is at our Texas facility.
